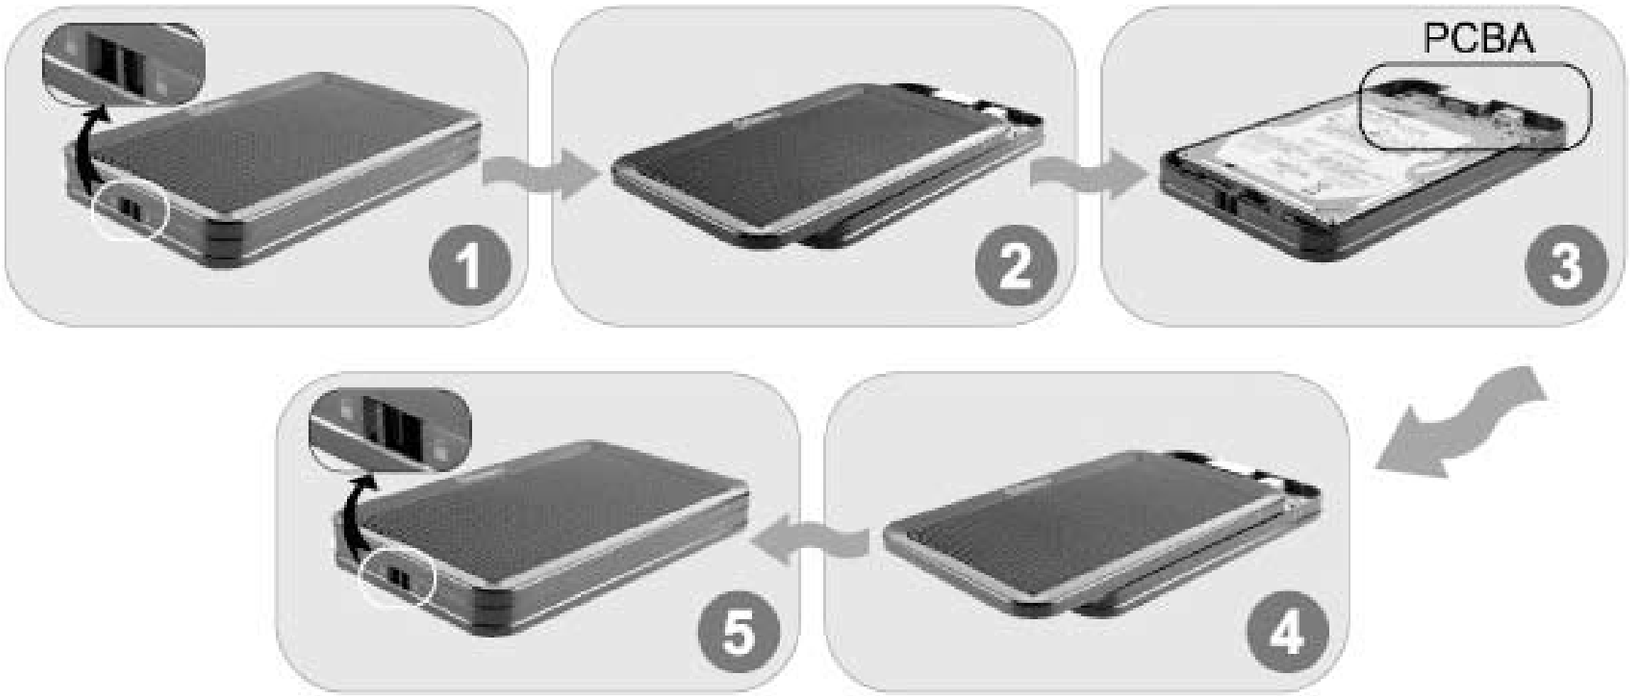
4. A. Make sure they are tightly connected.
   B. Slide the upper case back.
5. Shift the lock bar from "Unlock" to "Lock" .



E. Using your Jazzmate

Introduction

- If the HDD is for initiate use, please format it.

- The eSATA interface does NOT supply the power to the device. So please make sure the USB cable is also connected when using eSATA. (EB211ES only)

- If your computer fails to detect the device when connecting eSATA, please try "Computer Management"－"Disk Management"－"Action"－"Rescan Disk" to find the device.

Unplug Procedure

- Unplug Procedure on a PC (Microsoft Windows)*
  1. Click on the taskbar icon for the external hardware
  2. Choose the external HDD and confirm to remove it

- Unplug Procedure on a Macintosh (Apple Mac OS)*
  1. Drag the external HDD icon into the trash bin, then you can remove it.

- Unplug Procedure of eSATA
  eSATA connection is hot swappable only if motherboard supports this feature. Otherwise, we suggest you to unplug the connection after the system is turned off.

*For safe removal of your drive and assure no data is lost, always follow the unplug procedure. If not, errors message might show up.
